

MEHRAN ARBAB

PhD, Materials
Science &
Engineering

A veteran of science & technology, Mehran has extensive experience in new product development, process scale up, R&D management, and business development strategy. He is a nuclear engineer and materials scientist by training and has managed international R&D teams in glass and aerospace materials. During his 33-year industrial career, Mehran was passionately focused on the needs and perspective of technology stakeholders including external customers in the architectural, automotive, solar and aerospace markets, as well as his internal partners in manufacturing and business development. He has developed a number of market leading products and has been the author or coauthor of more than 45 US issued patents and 20 technical articles.
